

Grow from the top down

Think of us as your wingman.

At DirectScale, we know running your direct selling business is a challenge because we've been in your shoes. From commissions to inventory to customer support, the DirectScale Corporate Office brings all the mission-critical processes of your business into one easy-to-use command center. And when you grow, it grows with you in real time, supporting you every step of the way. We designed the Corporate Office as the new home of your business because we believe technology should work for you, not against you.

- Based on your rules
- Precision agility
- Fast and accurate
- Big picture perspective
- Data the way you need
- All in one and one for all
- Intelligent field support

Welcome to your new (work) home.

Advantages of using the DirectScale Corporate Office

DirectScale aggregates your disparate systems, tying together the Corporate and, Web Offices, eCommerce sites and 3rd party solutions like merchant processing. It's your single source of truth for your entire business: one connected Corporate Office, powered by the DirectScale platform.

Based on your rules

Nothing's worse than the prospect of a botched commission run. DirectScale's commissions engine scales in real time to the structure and complexity of your unique compensation plan. Backed by our decades of industry experience, our commissions engine is the best of its breed.

Precision agility

Since you likely adapt your comp plan to meet the changing needs of your growing business, you'll want to test those changes in-house using our industry-first comp plan editor. Want to see how an additional percentage point at a certain rank would affect your payout? Or a decrease in required PV? Tweak it and test it against custom profiles; then tweak and test it again. When you have it exactly right, commit it to your commissions payout.

Fast and accurate

Time spent waiting for commissions to run and fixing errors after a payout is time— and money—wasted. DirectScale is based in the cloud, which means quick and consistent payouts that don't depend on old hardware. Imagine running commissions in minutes from your smartphone! You can with your new Corporate Office.

Big picture perspective

Proactive, rather than reactive, behavior is a hallmark of successful organizations, but it's easy to get caught up in the small stuff when running your business. Using live KPIs, give your C-suite mission-critical information to inform their decisions with the Executive Dashboard.

Data the way you need

There's a story behind every sale; don't let it get lost in the numbers. With DirectScale's powerful reporting system, uncover what's driving the success of your business. And thanks to our SQL querying tool and open APIs, you have access to every data point in the system.

All in one and one for all

You shouldn't have to remember a laundry list of logins to manage your everyday business operations. The DirectScale platform aggregates your disparate systems, connecting merchants for money in/out, sales tax calculation, logistics and warehouse management and so much more.

Intelligent field support

Your field reps are the lifeblood of your business but do they know you have their back? Your new Corporate Office is the backbone of a rock-solid support team, providing all the info they need to support the field, from actionable data reports to seeing the Web Office through the eyes of the rep.

Let's get your business up and running. Visit directscale.com to learn more and schedule a demo.
